

PRACTISING WISELY

Reducing Unnecessary Testing and Treatment

PRACTICAL LEARNING * PROFESSIONAL DEVELOPMENT * CLINICAL LEADERSHIP

Unnecessary tests and over-medicalization are obstacles to providing high-quality patient care.

Join family physician instructors to **review clinically relevant scenarios** and get **useful online tools and resources** to help you reduce over-imaging, over-prescribing, and over-screening. **Get practical recommendations** you can **implement immediately into your practice** to make better testing and treatment decisions for your patients.

> Why attend?

At this *engaging, full-day* workshop you will:

- **Get practical learning** to identify opportunities and develop strategies to reduce over-medicalization
- **Expand your skills** in accessing and assessing reliable, current online resources for **evidence-informed** practice
- Integrate **relevant evidence** into individual patient care decisions and plans
- **Get practical strategies** to communicate and build consensus with patients
- Critically assess appropriateness of clinical practice guidelines while **engaging with local colleagues**
- **Get helpful tips** on promoting good healthcare stewardship

“Excellent use of online resources. ... I was not expecting to learn such a variety of clinically relevant information.”

“Patients respond really well to these types of [resources but] I find it hard to sift through what is out there and it is nice to find some that are credible. Now I will be more comfortable explaining things to my patients!”
