► Medical Mentoring for Addictions and Pain

The OCFP's **Medical Mentoring for Addictions and Pain (MMAP) Network** supports the **competence, confidence** and **resilience** of family physicians, so that they can continue to deliver high-quality care amid the growing complexity of patients with addictions and/or chronic pain.

How it works

- Mentees are matched with local physician **Mentors who are experts** in pain management and addictions.
- Mentors and Mentees together decide **when and how** they will meet and interact.
- Mentees get timely **one-on-one support, focused education** opportunities and **ongoing engagement** through an online portal (community of practice).
- Mentors **develop as educators** through mentoring relationships and engagement within MMAP and the wider Networks.

► Why join?

- 👉 **Practical learning for everyday practice**
Including identifying local resources and optimal treatment choices.
- 👉 **Current best evidence**
For example, when and how best to undertake opioid tapering.
- 👉 **Expanded skills**
Such as how to manage patients on methadone, and initiate and maintain patients on buprenorphine/naloxone.
- 👉 **Safe and supportive space**
One-to-one and group mentorship within the safe, non-judgmental space of the Network.
- 👉 **Ongoing relationships**
Mentors and Mentees build lasting professional connections.
- 👉 **Professional development**
The unique format offers valuable opportunities for development, and Mentors and Mentees may earn up to 15 Mainpro+® credits in this certified program.

► How to join

MMAP is available to all family physicians practising in Ontario.

There is no cost to join.

1. Complete the [MMAP Intake Form](#)* to help us learn about you and your needs in this area.
2. Watch your inbox for information about your Mentor and mentoring group, and to learn your next steps.
